Dear Mr Davies

Re: The Australian Association of Cosmetic Surgery Incorporated

I acknowledge safe receipt of your letter of 21 December 1995 and note the various issues which you have raised on behalf of the Australian Association of Cosmetic Surgery Incorporated (AACS) and others.

I do not propose to comment upon the various issues raised in your letter without seeing the material upon which those issues are based, however, I would like to provide you and your clients with an assurance that it is not suggested by this Society that persons other than qualified plastic surgeons are not able to competently perform cosmetic surgery. However, this Society believes that members of the public have a right to know of the respective qualifications for membership of our two groups so that members of the public are in a position to make an informed decision concerning their choice of professional for the procedure contemplated.

I hope that your client will feel free to contact me direct, if in the future there are further issues which are of mutual concern.

Yours faithfully

Mr Randall Sach
President
